摘要

Domestic implementation of public art to have more than ten years, but public art is more than only in public buildings, in order to improve this situation the Government to formulate a public art set up incentives to expect public art deeply rooted in people's lives can be. In this study, according to Liang Weibin commercial building space planning and design of public art assessment criteria of the Institute made commercial public art space planning criteria for research. And so the design assessment scales, and to verify the Delphi method experts.
