摘要

Light peppered throughout the universe, even in the no water, no air is at, often still had a "light" of the shine. Revelation in the Bible, "God is light", and Jesus said "I am the light of the world". Jesus had said to His disciples "You are the light of the world". Apostle Paul also said that "You seem like the light lamp to the body of substantial in the world". How should we do it become reality? There must be a very positive meaning, as there is no light, there is no way to carry out photosynthesis of plants, no light there would be haven't plant and animal and human. This paper attempts to integrate the Bible on the "light" of the Enlightenment with Nobel Prize winner in 2003 of research. This paper also attempts to reference the general relativity and recent literature contained in the "light" message, Quality(neutrinos...), Energy (infrared...), as well as its for the transmission, treatment and healing, purification case introduction, and then return to the Bible, try to use the God's economy to explore the truth and application overview, with a view to contribute to the mystery and amazing the enjoyment of Triune God. And hope that saints can know to apply, and experience more about the amazing light because of this paper.
