## 摘要

Teenagers use the internet often, therefore problems associated with internet addiction arise. This study aims at finding ways to prevent or counsel youngsters with internet addiction. This study makes use of DEMATEL with family, school, society and laws as facets of discussion in order to find out their cause/effect to formulate the best counseling strategy. We hope that this research will be of help to counselors involved in guiding internet addicted teens.

關鍵字：Internet addiction, DEMATEL
