### Abstract

How to provide the information about problem and course to learner? It was the major function that SPC table would solve. Using SPC table made the exam data became the quantification profile. It could provide us much information that came from each student, problem and course. First, viewed students had progressed status in each chapter of posttest. Second, displayed the further data about the problems. Third, the educator could comprehend the education situation. We used much data to try out the effect about SPC table. In the experiment we added some variable was we give the feedback information to class B. The significant propose was made difference between two classes and viewed the SPC table easily. The result exhibited obvious the information from each exam.

Keyword: SPC table, quantification profile, comprehend
